Making Visits Meaningful Survey

OARC and Family Councils Ontario (FCO) invite you to share your thoughts on meaningful visits at long-term care homes

The Ontario Association of Residents' Councils (OARC) and Family Councils Ontario (FCO) are working together on a resource that will help long-term care (LTC) homes make visits meaningful and successful, **and we need your help!**

To help create the resource and centre the experiences, needs, and preferences of residents and families, we have created a survey to seek your feedback. This survey will inform the development of leading practices to ensure that families, residents and the home staff/team members who support visiting initiatives have the tools they need to make the visits successful, meaningful, and engaging for everyone.

You may access the survey here: <https://www.surveymonkey.com/r/MeaningfulVisits>

If you have questions about the survey or how the information will be used, contact Samantha Peck (FCO) at speck@fco.ngo or myself, Dee Lender (OARC) at dlender@ontarc.com.

Thank you for sharing your insights and for helping our respective organizations in our effort to collect and share promising practices that may enhance the visiting experience for residents and families as well as the home teams executing them.

Sincerely,

Dee Lender
Executive Director
