Connie Redmond

Connie Redmond is honoured to be part of OARC and participate in a Board of Directors role. With over 16 years experience in Long Term Care and working with seniors, Connie brings to the OARC Board of Directors experience in Recreation and Resident Services in Long Term Care in both private and municipal sectors. Connie is a Registered Therapeutic Recreation professional and affiliated with Therapeutic Recreation Ontario. In the past she has developed curriculum and instructed the Recreation Leisure Course at the College level in the Retirement Management program at Fanshawe College.

Past involvement with OARC was in the pilot project of “Through Our Eyes” and Connie was the first recipient awarded the OARC Education Bursary, where she pursued and completed the Long-Term Care Leadership Program. Connie feels that her values are perfectly matched with OARC in resident advocacy, lived experiences, quality improvement and change, and that we are embarking on a unique time in Long Term Care where it is imperative that Resident voices be advocated for to bring forth change that the Long-Term Care and seniors industry greatly needs. Connie is excited to be part of Ontario Residents’ Council Association and is looking forward to supporting and advocating for Resident voices across Ontario.
